COURSE OBJECTIVES

Upon completion of the course, participants will be able to:

- 1) Describe the neuropathologic and clinical features of syndromes associated with severe alterations in consciousness.
- 2) Understand the indications for functional neuroimaging studies in the assessment of patients with disorders of consciousness.
- 3) Administer and score the CRS-R assessment protocol.
- 4) Interpret neurobehavioral findings generated by the CRS-R relative to level of neurocognitive function, lesion locus and prognosis.
- 5) Identify and analyze neurobehavioral response profiles in individuals with severe disorders of consciousness.
